Other information you would like voters to know about your platform:

The Clerk needs a background in technology. Our courts are heavily reliant on complex software to run their daily operations. The Clerk is responsible for managing that technology and protecting it. But our current Clerk failed and a devastating cyber attack paralyzed court systems for almost two weeks. I have the background and experience to do better. If elected, I will make cyber security a top priority. I am a licensed attorney and I work at one of the largest legal technology companies in the world. I am the only candidate in this race with a background in both law and technology. Those things go to the heart of this job. Everything I have done in my professional life has prepared me to be the Clerk of Courts and I would be proud to serve.
